Sporting News.

Fisk University Defeated by State Normal—in First Game Normal Triumphs 9 to 6.

The A. & I. State Normal School last Saturday on Bennett field in its first game of baseball defeated the strong Fisk nine by the close score of 9 to 6. It being an ideal baseball day, the boosters of both schools were out in full, and showed their deep interest by their rooting.

Davis, besides letting his opponents down with five hits, struck out eighteen men. He was ably supported by Howell, his battery partner, who handled his speed with great ease. Fisk was forced to use three pitchers, namely, Suggs, Smith and Lewis, but none of them could stop the onslaught of the Normal boys who ran bases at will.

For the State Normal, the battery work was the bright feature, while for Fisk, the hitting of Kindle, who made a double, triple and homer out of three times at the plate, aided the Fisk boys in getting all of their runs.

COMMENCEMENT OF MEHARRY MEDICAL COLLEGE.

(Continued from page 1.)

ciation of Dental Faculties and Pharmaceutical Colleges. The committee that is sustained by the Carnegie foundation sustained the standing that was given Meharry by these Associations.

Dr. Hubbard has spent 49 years in educational work among Negroes in Nashville. In 1864 he began this work in the Nelson Merry Baptist Church on Pearl street, where he established a private school under the auspices of that church. Rev. Merry was a friend and supporter of Dr. Hubbard long before he graduated in medicine. It is an interesting story to have Dr. Hubbard tell you of the early beginning of his work in Nashville along educational lines.

In speaking of the opportunities of the Negro physicians it was brought out that they come in closer contact with the white men who are engaged in the same profession than any class of professional men of the race. The day has never been when the Negro physician could not get a conference with a white physician. They have always shown a willingness to help the Negro doctors in every way possible.

Another impression the Meharry students receive while under the tutelage of Dr. Hubbard is race confidence. There have been times when the students have not been willing to give such work as comes in their line to those Negroes who have prepared themselves to do it. But Dr. Hubbard goes out of the way to see to it that they patronize Negroes who are engaged in business and who have proved that they are competent to do first-class work. This is drilled into the minds of the young doctors. Such training prepares them for leadership as they go out into the world.

Dr. Hubbard is a great believer in the possibilities of the race, and he never fails to impress the students with that fact. He believes that the students of Meharry are competent to go out into the world and make a creditable showing in medicine and he also believes that if the Negro can learn the science of medicine he also has the capacity to learn other things, and such principles are being inculcated in the minds of the students of Meharry. Dr. Hubbard is not only sending out men trained as physicians, but men trained in the belief of self-help and self-confidence.

Graduates of Meharry Medical College since its Establishment.

The following is the number of graduates who have received diplomas at the hands of its faculty: Medical graduates, 1,214; dental, 236; pharmaceutical, 197; nurses, 40. Total number of graduates from Meharry, 2,687. The annual income of these physicians ranges from \$500 to \$5,000, with an average of about \$1,000. The majority of them have good homes and well-equipped offices and libraries. There are exceptional cases, of course, with the physician as with all other men. Some have accumulated considerable wealth and they have been able to invest their earnings profitably and have received good returns from the same, while others who have not been so crafty in the art of business but who nevertheless have done

as much for humanity in an earnest and painstaking performance of their duty toward humanity.

There are some doctors who are contented to earn a fair living, and who devote all their time and energy to research and in giving to the world what they have learned in their profession that the suffering of humanity may be lessened. So if all these men do not accumulate great wealth for themselves they cannot be put down as failures, for they have in truth performed a great service for humanity.

Attendance at Meharry This Year.

In the medical department there were 323; in the dental department, 136; pharmaceutical, 49; nurses, 14. Total enrollment this year, 522. This is a little below the enrollment of last year, due to several causes. The students who go north every summer are finding it harder each year to secure employment, as the immigration tide continues in that section, and there is not such a demand for help as there was years ago. Another thing that made it inconvenient for some was due to the floods that caused a great loss to the crops in the Southern States in 1912. It is predicted, however, that the attendance next year will be greater than it was last year or is this year, as the conditions are most favorable to farmers, and the high ranking of Meharry will cause many to come from other sections of the country. There are medical colleges that have been graded as high as Meharry which, since the test has been applied, could not come up to the standard.
